RACK SAFETY PRODUCTS

Flue Guard™ Transverse HD

US Patent #7,857,152

The HD

The Flue Guard - Transverse HD prevents transverse flue encroachment and was designed specifically for use of palletized goods in pallet racking.

Applications

- Allows your sprinkler system to function as designed
- Provides 3" transverse flue space on each side of rack post (6" total)
- Heavy duty tube member designed for up to 48" frames (deeper by special request)
- Bolt-less front and rear beam type connections make for easy installation, without any special tools or skills
- Can be used at pallet and/or product elevations
- Satisfies insurance company guidelines and local building inspector criteria (may be required by Inter national Fire Code 2012 Edition)
- Connectors available for all major rack brands
- Suitable for new installations or scheduled retrofit programs
